24 JAN 1960

Mr. George P. Sutton, President
American Rocket Society, Inc.
300 Fifth Avenue
New York 36, New York.

Dear Mr. Sutton:

Thank you very much for your letter of 13 January enclosing a copy of the Summary tape of STATINTL which contains the report made by the American Rocket Society to President Eisenhower.

As I wrote Mr. Dean, the recommendations of the group on a subject of such current national importance are welcome and shall be kept in mind in our discussions on future programs in the missile and space flight field.

Your courtesy in writing to me again is indeed appreciated.

Sincerely,

SP

Allan M. Dulles
Director

My dear Mr. Dulles:

I am enclosing a copy of the January issue of ASTRONAUTICS containing on page 18 the proposal recently made by the Space Flight Committee of the American Rocket Society to President Eisenhower. You will recall that a multilithed copy of the report was sent to you several weeks ago.

This Space Flight Program was prepared before Sputnik and gives the collective thoughts of outstanding rocket and missile experts on a logical sequence of space flight development objectives, of underlying purposes and a suggested organization for doing the job. I hope that you will find it of interest and I urge that you consider its implications.

Very truly yours,

George P. Sutton

George P. Sutton
